

XM radio is a welcome relief to the overplayed music heard of AM and FM stations. The only thing that would make it better is local weather and traffic reports. Most of this information is gained at government expense anyway, so all should have equal access to it. As a taxpaying listener I think I should be allowed to hear this information no matter what radio station I listen to. Please grant access and broadcast rights to this information to XM and stop backing the monopolizing National Association of Broadcasters.
